Frequently Asked Questions

Can I use my own tags alongside bitse.io software?
Yes, any tag can be used with bitse.io software, but only if they are not previously encoded.

Can this software be customized to my specific needs?
Bitse.io can be customized for your solutions. To discuss specific customization of the platform, contact us at bitse@identiv.com

Do I login to a web application or desktop software?
It's a hosted service via the web.

How are you addressing data privacy concerns with this solution?
All interactivity with an end user is fully opt-in. The system does not capture data without permission.

Is this product complimentary to other SaaS products?
Yes. It can fully integrate into other platforms and tools - ask your sales rep for more details on your specific needs.

Will I be notified of updates to the platform, or will they automatically install?
All updates are conducted via a push notification.
